

PAIATVS1 (IMPLEMENTING ADVANCED TELEPRESENCE VIDEO SOLUTIONS PART 1) 1.0

Objetivo

TVS1 is a 5-day practical based course concentrating on the operation, installation, configuration maintenance and troubleshooting of the Cisco TelePresence C Series codecs, Cisco TelePresence MCUs and Cisco TelePresence Management Suite. In addition cover the basic configuration of the Cisco TelePresence Video Communication Server to get your network up and running. As well as setting up your network you will also use TMS and VCS to troubleshoot your network. Instructors will simulate faults on all equipment giving students the chance to put troubleshooting skills into practice. At the end of the 5 day course students will be able to install, configure, maintain and troubleshoot a basic Telepresence network including endpoints, MCUs, TMS and VCS.
