

SPEDGE (IMPLEMENTING CISCO SERVICE PROVIDER NEXT-GENERATION EDGE NETWORK SERVICES) 1.2

Objetivo

This course is a five-day course that is designed to help students prepare for the Cisco CCNP SP certification. The SPEDGE course is a component of the CCNP SP curriculum. The SPEDGE course is designed to provide service provider professionals with information on the use of service provider VPN solutions. The goal is to train professionals to enable service provider point of presence to provide Layer 2 and Layer 3 VPNs. The SPEDGE training reinforces the instruction by providing students with hands-on labs to ensure they thoroughly understand how to implement VPNs within their networks. The course also includes classroom activities with remote labs that are useful to gain practical skills on deploying Cisco IOS/IOS XE and Cisco IOS XR features to operate and support service provider network.
