

DCUCT (TROUBLESHOOTING CISCO DATA CENTER UNIFIED COMPUTING) 5.0

Objetivo

The Troubleshooting Cisco Data Center Unified Computing (DCUCT) v5.0 is a 3-day course designed to prepare system engineers and implementers with the knowledge and hands-on experience to troubleshoot Cisco UCS B-Series and C-Series servers operating in standalone and integrated modes. The course offers the student hands-on experience with configuration procedures and a familiarity with common troubleshooting scenarios and recommended solutions. Upon completing this course, the learner will be able to meet these overall objectives: Describe the Cisco UCS B-Series architecture, installation, and configuration, and the processes and tools for determining related issues Describe troubleshooting processes on the standalone Cisco UCS C-series Describe the valid Cisco UCS C-Series integrated architecture and the process of determining issues related to integration of Cisco UCS C-Series server with Cisco UCS Manager.

Público Alvo

Channel Partner / Reseller Customer Employee

Pré-Requisitos

Knowledge covered by the Introducing Cisco Data Center Technologies (ICDCT) course UCS configuration knowledge, such as is covered in the Configuring Cisco Data Center Unified Computing (DCUCS) course Knowledge covered by the Implementing Cisco Data Center Unified Computing (DCUCI) course Familiarity with server virtualization (for example, VMware vSphere and Microsoft Hyper-V) Familiarity with administration of common operating systems (for example, Linux and Windows).

Carga Horária

24 horas (3 dias).

Conteúdo Programático

Module 1: Cisco UCS B-Series Troubleshooting
Module 2: Cisco UCS C-Series Troubleshooting
Module 3: Cisco UCS C-Series Integration Troubleshooting
